

Building Bridges

INTRO

1. Strophe:

Being on top is a big success
Winning or losing – we should care less
What's it all for if there's no one to share
I need a friend who helps me to bear

Prechorus:

Friendship and music – that's what we need
Let's feel the rhythm and melody – open your heart
We're building bridges, take my hand, we'll do it together

Chorus:

It's a shame that people hate
It's a shame that humans fight
The world is better if we love instead
The world is a bad place but we can change
This is the song we will never forget
It's a shame that people hate
It's a shame that humans fight
The world is better if we love instead
The world is a bad place but we can change
This is the song we will never forget

INTERLUDE

2. Strophe:

I have a dream, it's for me and you
We are all equal – this dream could come true
The world could be better with friendship and peace
So care about others, cause we must stop

Prechorus:

Hate and torture, let's stop it together
We should accept all the people 'cause we don't live forever
I can lend you a hand and then we will be stronger

Repeat chorus
